

# Cutting discs - Freehand cut-off wheels

★★★  
PREMIUM

## Wheel flange - accessory

for cut-off wheels

### Application

- + Developed to improve the stability of thin cut-off wheels with diameters of 178 mm and 230 mm

### We recommend

- + For cut-off wheels up to 2.0 mm in a straight design and a diameter of 178 mm or 230 mm

### Advantage

- + Significantly increases lateral stability
- + Made of tempered tool steel for angle grinders with an M14 drive screw
- + Enables even more precise cutting guidance and improves first-cut performance
