

Flexible Abrasives - Roller

PREMIUM rollers made of abrasive fabric

for steel, stainless steel and nonferrous metals

Application

- + Light deburring and cleaning, glazing on small and large surfaces, removing oxide film and defects from previous machining stages, restoring the finish after bending or welding.

We recommend

- + A ROUGH / A MEDIUM for cleaning weld seams, removing rust and coatings and for light deburring.
- + A FINE for processing paint and lacquer, for cleaning machine components and for finishing.
- + A VERY FINE for finishing a wide variety of workpieces

Advantage

- + Extremely flexible in application
- + Exceptional ease of use
- + Low noise emission
- + High resistance to clogging
