

# Grinding wheels - Rough grinding wheels

## PREMIUM rough grinding wheels

for stainless steel

### Application

- + For a host of grinding applications on different stainless steel grades

### We recommend

- + 4 mm thickness for peripheral grinding
- + 7 mm thickness for rough grinding

### Advantage

- + Special bond system for stainless steel with good abrasiveness and long lifetime
- + The chemical purity of the product prevents corrosion, pitting corrosion and reduction in fatigue strength for the best results on stainless steel
- + Comfort Start ensures a comfortable start when grinding and increases the level of working comfort

Form	Type number	Dimension	Specification	PU	
	27	117064	115 x 4 x 22,23	A 30 R- BFX	10 Pcs.
