

## Dust Extraction Systems VCE1200D / VCE2400D / VCE3600D

1-phase, motor power of 1.2 kW, 2.4 kW or 3.6 kW

The new dust extraction systems VCE1200D, VCE2400D and VCE3600D are specially optimised for floor grinding, but are also excellent for other applications where efficient dust collection is required. Customers can choose between three different power classes, 1.2 kW, 2.4 kW and 3.6 kW, based on their individual

requirements. All three models are dust collection H-Class certified and equipped with a cyclone system, a conical pre-filter and reliable H13 HEPA filters. A simple, user-friendly operation is ensured by easily accessible controls, low noise level and the sophisticated Longopac dust bag system. A compact design and

lightweight construction allow for trouble-free transport. An additional advantage is the use of non-marking 10-inch wheels, which are construction site proof.
