

Cutting discs - Stationary cut-off wheels

PREMIUM laboratory cut-off wheels

for steel and HSS

Application

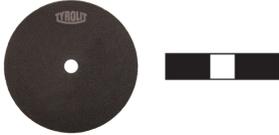

- + For steel and HSS applications
- + For dry cutting on stationary machines and automatic saw sharpening machines

Advantage

- + Maximum performance with greatly reduced tool wear
- + Broad assortment
- + Less exertion

We recommend

- + The workpiece must be fixed during machining and the wheel must not be exposed to lateral load
- + Note maximum operating speed of 63 m/s
