

Flexible Abrasives - Quick-Change

PREMIUM ZA-P43 PE Y Quick-Change discs
 for steel

Application

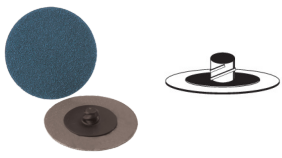

- + Mould and model making, automotive construction and repair, aerospace industry, manufacturing of small containers and equipment

Advantage

- + Increased stock removal rate
- + High viscosity of zirconium leads to improved resistivity
- + Perfectly suited for small and hard-to-reach areas
- + Long lifetime

We recommend

- + System R with external thread: The larger adhesive surface leads to greater resistance against mechanical stress in comparison to system S.
- + Grit size 36/40/50/60 for maximum stock removal
- + Grit size 80/120 for fine grinding

Form	Type number	Dimension	Grain	Max RPM	PU
