

Cutting discs - Stationary cut-off wheels

PREMIUM cut-off wheels

for nonferrous metals

Application

- + For cutting different grades of nonferrous metals such as aluminium, aluminium bronze, aluminium base alloys, copper, bronze, brass, nickel silver and titanium
- + For workpieces with large cross-sections, solid material and profiles
- + Perfect for use for traverse and chop cuts on stationary cutting machines

Advantage

- + New specifications prevent clogging of the grinding wheel
- + Especially rough side surfaces thanks to a special pressing process, as a result low lateral friction and very low heat build-up on the workpiece
- + The product offers maximum cutting ability and lifetime

We recommend

- + Note maximum permissible peripheral speed (80 m/s and 100 m/s)

No output definition. Please check the definition for the channel "marketing_cm" at the product /products/metal-industries/Metal-Trade/Cutting/Stationary cutting machines/Cut off stationary Premium nonferrous
